Education

- B.S. Software Engineering | Milwaukee School of Engineering | GPA: 3.92
Est. Graduation : May 2027
-

Prior Experience

Krueger International | Automation Engineer Apprentice | Jul 2022 – Dec 2023

- Troubleshoot and maintained automated robotic systems to minimize downtime and maintain production flow
- Programmed and modified robot control logic to optimize machine performance
- Assisted with mechanical and electrical integration tasks on manufacturing equipment

Brown County Parks | Parks Maintenance | Jun 2024 – Aug 2026

- Used my automation skills to repair and customize a firewood vending machine to fit the park's needs
 - Gained experience working with unfamiliar hardware
 - Performed various other tasks related to park maintenance
-

Skills

- | | | |
|--------------|------------------------------|-----------------------|
| - Java | - Object Oriented Design | - Operating Systems |
| - JavaScript | - Web App Development | - Algorithms |
| - C/C++ | - Agile Software Development | - Design Patterns |
| - Lua | - Software Verification | - Cyber Security |
| - Python | - Version Control (GIT) | - Computer Networking |
-

Leadership

Chair | MAGE (Milwaukee Anime & Gaming Enthusiasts) | September 2023 – Present

- Organized and coordinated with members interested in playing large strategy games
- Taught new players the rules and strategy of various board games

Projects

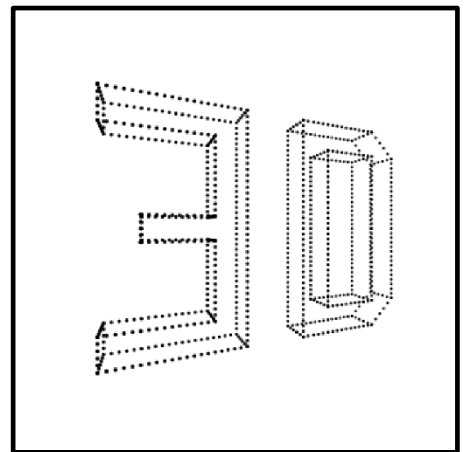

The Trials

- Built a puzzle platformer in Java using JavaFX
- Implemented custom a file parser that reads .txt files and converts them into levels made up of highly customizable components
- Implemented modular logic gates using the observer design pattern
- Created graphical assets used throughout the game

3D Engine

- Developed mathematical transformations to project 3D coordinates onto a 2D plane
- Added interactive controls to adjust the position and orientation of the camera
- Programed to be reusable, forming a foundation for future development

PLIPS

- Contributed to development of an IDE for assembly languages aimed at beginners
- Participated in an environment utilizing professional practices
- Debugged and resolved software defects
- Developed a visualization module to illustrate CPU bit flow during program execution
